Professional Summary

Full-Stack Software Engineer with expertise in building scalable web applications, distributed architectures, and AI-integrated data pipelines. Proficient across the stack using Java, Node.js, and PostgreSQL, alongside cloud deployment on AWS. Strong foundation in Data Structures & Algorithms and Object-Oriented Programming, with a proven track record of accelerating product delivery from responsive client interfaces to secure backend systems.

Education

Pune Institute of Computer Technology (PICT) — Pune, India
B.Tech in Electronics and Computer Engineering ***(CGPA: 9.50/10)*** — Aug 2025 – May 2028

Bharati Vidyapeeth's J.N.I.O.T. — Pune, India
Diploma in Computer Technology ***(Percentage: 93.26%)*** — Aug 2022 – May 2025

Work Experience

Script Lanes | *Full Stack Developer Intern* — On-Site | Jun 2026 – Present

- Designed and implemented end-to-end AI Notes processing engine for **MBBS Mentor**, integrating AWS S3 and OpenRouter APIs to automate document ingestion, processing, and parsing workflows.
- Engineered localized data aggregation pipelines to process historical user activity and generate automated weekly and monthly concept summaries.

Word Lane Tech | *Backend Developer Intern* — Remote | Jul 2025 – Dec 2025

- Developed and tested modular RESTful APIs using Node.js and Express.js to support production business services and application workflows.
- Collaborated with frontend engineering teams to translate product requirements into maintainable backend services, successfully testing and shipping **3 core service layers**.

Skills

- **Languages:** Java, C, Python, SQL
- **Cloud & Utilities:** AWS (S3/EC2/Lambda), Git, GitHub, LLM APIs
- **Core Computer Science:** Data Structures & Algorithms, OOP, DBMS, OS
- **Frameworks & Technologies:** Node.js, Express.js, PostgreSQL, SQLite
- **Professional:** Leadership, Critical Thinking, Effective Communication, Teamwork & Collaboration

Projects

QueryPilot | *Python, LangChain, DuckDB, SQL, Data Analytics* — Feb 2026 – Apr 2026

- Engineered an LLM-powered analytical engine with conversational pipelines for natural-language querying and analysis across relational databases.
- Ingested and processed **250,000+ UPI financial transactions** to derive revenue velocity metrics, securing **2nd place nationally** at the IIT Bombay InsightX challenge for pipeline optimization.

TradersDesk | *Java, PostgreSQL, Supabase, SQLite* — Mar 2026 – May 2026

- Developed a local-first financial ledger and trade management application with a native desktop interface for bills, payments, returns, and commission settlements.
- Engineered offline-first persistence using SQLite and Hibernate ORM, with PostgreSQL (Supabase) as the cloud backend and incremental HTTP synchronization for multi-device consistency.

Awards & Achievements

- **1st** – TechSprint'26 National Hackathon (Team Leader, 250+ teams)
- **2nd** – InsightX'26, IIT Bombay Leadership Analytics Hackathon (Team Leader, 1,700+ teams)
- **National Finalist:** Algorand HackSeries 3.0, Goa (Top 30 of 800+) | Meta x OpenEnv x PyTorch Hackathon, Bangalore (Top 800 of 52,000+) | GDG Cloud Pune Hackathon (Team Leader, Top 20 of 1,000+)
- **Technical Head** – Startup and Innovation Cell (SIC), PICT: Directed technical strategy, system design, and cloud architecture for **8 early-stage startups**, driving robust MVP development and delivery.
- **Complete Club Coordinator** – PICT ACM Student Chapter: Led **600+ students** across **23 cross-functional teams** to execute **12 major competitions and 15+ events**.
